

Twist Bioscience Now ISO 27001:2013 Certified for Information Security Management System

February 12, 2020

SAN FRANCISCO, Calif.--(BUSINESS WIRE)--Feb. 12, 2020-- Twist Bioscience Corporation (NASDAQ: TWST), a company enabling customers to succeed through its offering of high-quality synthetic DNA using its silicon platform, today announced it has received ISO 27001:2013 certification for its Information Security Management System (ISMS).

ISO 27001:2013 is an information security standard published by the International Organization for Standardization (ISO), the world's largest developer of voluntary international standards, and the International Electrotechnical Commission (IEC). Twist Bioscience's certification was issued by A-lign, an independent and accredited certification body based in the United States on successful completion of a formal audit process.

This certification is evidence that Twist has met rigorous international standards in ensuring the confidentiality, integrity, and availability of its information security management system. This includes management of information security, privacy and compliance for internally developed and third-party applications and systems to sufficiently protect Twist intellectual property, customer intellectual property and other sensitive customer information.

"We, at Twist Bioscience, are committed to the highest level of quality for all of our systems to keep our company and customer data private and secure," said Emily M. Leproust, Ph.D., CEO and co-founder of Twist Bioscience. "We have invested both financial and dedicated information technology resources to ensure that we continuously improve our security, with this certification validating our rigorous work against a total of 114 ISO 27001 security controls across our audited systems and infrastructure."

About Twist Bioscience Corporation

Twist Bioscience is a leading and rapidly growing synthetic biology company that has developed a disruptive DNA synthesis platform to industrialize the engineering of biology. The core of the platform is a proprietary technology that pioneers a new method of manufacturing synthetic DNA by "writing" DNA on a silicon chip. Twist is leveraging its unique technology to manufacture a broad range of synthetic DNA-based products, including synthetic genes, tools for next-generation sequencing (NGS) preparation, and antibody libraries for drug discovery and development. Twist is also pursuing longer-term opportunities in digital data storage in DNA and biologics drug discovery. Twist makes products for use across many industries including healthcare, industrial chemicals, agriculture and academic research.

Legal Notice Regarding Forward-Looking Statements

This press release contains forward-looking statements. All statements other than statements of historical facts contained herein are forward-looking statements reflecting the current beliefs and expectations of management made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties, and other important factors that may cause Twist Bioscience's actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Such risks and uncertainties include, among others, the risk of breach of Twist's security measures, the risks and uncertainties of the ability to attract new customers and retain and grow sales from existing customers; risks and uncertainties of rapidly changing technologies and extensive competition in synthetic biology could make the products Twist Bioscience is developing obsolete or non-competitive; uncertainties of the retention of a significant customer; risks of third party claims alleging infringement of patents and proprietary rights or seeking to invalidate Twist Bioscience's patents or proprietary rights; and the risk that Twist Bioscience's proprietary rights may be insufficient to protect its technologies. For a further description of the risks and uncertainties that could cause actual results to differ from those expressed in these forward-looking statements, as well as risks relating to Twist Bioscience's business in general, see Twist Bioscience's risk factors set forth in Twist Bioscience's Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission on February 10, 2020. Any forward-looking statements contained in this press release speak only as of the date hereof, and Twist Bioscience specifically disclaims any obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise.
