SOUTH SAN FRANCISCO, Calif.--(BUSINESS WIRE)--Feb. 2, 2024-- [Twist Bioscience Corporation](#) (NASDAQ: TWST), a company enabling customers to succeed through its offering of high-quality synthetic DNA using its silicon platform, today reported financial results and business highlights for the first quarter of fiscal 2024 ended December 31, 2023.

"We're starting fiscal 2024 off strong with record revenue of \$71.5 million for the first fiscal quarter, coming in above our projection, with a gross margin of 40.5%," said Emily M. Leproust, Ph.D., CEO and co-founder of Twist Bioscience. "In SynBio, after a limited launch of Express Genes in November, we expanded the offering to include midi and Maxi preps at Express speed and over time, we expect this offering will allow us to both expand our share of market and convert the Maker's Market of researchers who make their own genes into DNA buyers."

Dr. Leproust continued, "NGS had a strong quarter, with our top ten customers accounting for 44% of NGS revenue. As we move through the year, we plan to introduce new products and differentiated solutions to our customers and remain laser focused on revenue growth, margin expansion and financial discipline as we progress on our path to profitability."

### About Twist Bioscience

[Twist Bioscience](#) is a leading and rapidly growing synthetic biology and genomics company that has developed a disruptive DNA synthesis platform to industrialize the engineering of biology. The core of the platform is a proprietary technology that pioneers a new method of manufacturing synthetic DNA by "writing" DNA on a silicon chip. Twist is leveraging its unique technology to manufacture a broad range of synthetic DNA-based products, including synthetic genes, tools for next-generation sequencing (NGS) preparation, and antibody libraries for drug discovery and development. Twist is also pursuing longer-term opportunities in digital data storage in DNA and biologics drug discovery. Twist makes products for use across many industries including healthcare, industrial chemicals, agriculture and academic research.
