

Twist Bioscience to Present at the 35th Annual J.P. Morgan Healthcare Conference

January 4, 2017

SAN FRANCISCO, Calif. – January 3, 2017 – Twist Bioscience, a company accelerating science and innovation through rapid, high-quality DNA synthesis on silicon, today announced that Emily Leproust, Ph.D., Twist Bioscience chief executive officer, will present at the 35th Annual J.P. Morgan Healthcare Conference on Tuesday, January 10 at 9:30 a.m. Pacific Time in San Francisco.

About Twist Bioscience

At Twist Bioscience, our expertise is accelerating science and innovation by leveraging the power of scale. We have developed a proprietary semiconductor-based synthetic DNA manufacturing process featuring a high throughput silicon platform capable of producing synthetic biology tools, including genes, oligonucleotide pools and variant libraries. By synthesizing DNA on silicon instead of on traditional 96-well plastic plates, our platform overcomes the current inefficiencies of synthetic DNA production, and enables cost-effective, rapid, high-quality and high throughput synthetic gene production, which in turn, expedites the design, build, test cycle to enable personalized medicines, pharmaceuticals, sustainable chemical production, improved agriculture production, diagnostics, biodetection and data storage.
