

Twist Bioscience to Present at The 2015 Wedbush PacGrow Healthcare Conference

August 6, 2015

SAN FRANCISCO, Calif. – August 5, 2015 — Twist Bioscience, a company focused on synthetic DNA, today announced that Emily Leproust, Ph.D., chief executive officer of Twist Bioscience, will present at the 2015 Wedbush PacGrow Healthcare Conference on Wednesday, August 12th at 10:20 a.m. Eastern Time at Le Parker Meridien Hotel in New York City.

About Twist Bioscience

At Twist Bioscience, our expertise is synthetic DNA. We have developed a proprietary semiconductor-based synthetic DNA manufacturing process featuring a 10,000-well silicon platform capable of producing synthetic biology tools, such as oligonucleotides, genes, pathways, chassis and genomes. By synthesizing DNA on silicon instead of on traditional 96-well plastic plates, our platform overcomes the current inefficiencies of synthetic DNA production, and enables cost-effective, rapid, high-quality and high throughput synthetic gene production. The Twist Bioscience platform has the potential to greatly accelerate the development of personalized medicine, sustainable chemical production, improved agriculture production as well as new applications such as in vivo diagnostics, biodetection and data storage.
