About Twist Bioscience Corporation

We are leading and rapidly growing synthetic biology company that has developed a disruptive DNA synthesis platform to industrialize the engineering of biology. The core of our platform is a proprietary technology that pioneers a new method of manufacturing synthetic DNA by "writing" DNA on a silicon chip. We are leveraging our unique technology to manufacture a broad range of synthetic DNA-based products, including synthetic genes, tools for next-generation sequencing (NGS) preparation, and antibody libraries for drug discovery and development. We are also pursuing longer-term opportunities in digital data storage in DNA and biologics drug discovery. We make products for use across many industries including healthcare, industrial chemicals, agriculture and academic research.
