- Shipped products to approximately 2,200 customers in fiscal 2020, versus approximately 1,300 in fiscal 2019.
- Presented data on our Twist Custom Target Capture Panel, Fast Hybridization Enrichment System and our Target Enrichment for Infectious Disease at the American Society of Human Genetics 2020 Annual Meeting.
- Announced broad strategic partnership with Neogene Therapeutics, Inc. to leverage Neogene’s proprietary expertise in targeting tumor neo-antigens, mutated proteins found in cancer cells due to cancer-associated DNA mutations, together with Twist’s DNA synthesis platform and product lines to develop personalized chimeric antigen receptor (CAR) T cell therapies and T cell receptor (TCR) therapies for patients with cancer.
- Reported preclinical data demonstrating the potent neutralizing effects of multiple potential therapeutic antibodies identified by Twist Biopharma, both Immunoglobulin G (IgG) antibodies and substantially smaller single domain VHH “nanobodies,” against SARS-CoV-2, the virus that causes COVID-19. These neutralizing effects were found to be comparable to or better than those seen with antibody candidates derived from patients who had recovered from COVID-19. The data were collected from studies conducted by Saint Louis University and independently verified by scientists at Colorado State University.
- Achieved significant milestones on our DNA data storage roadmap to miniaturize the silicon platform technology down to 150 nanometer pitch or less. Twist is now consistently able to synthesize DNA using five-micron devices at a 10 micron pitch. In addition, we have fabricated our next R&D-stage silicon chip with 300 nanometer devices on a one-micron pitch chip.

- Formed the DNA Data Storage Alliance with leading technology and synthetic biology companies to create a comprehensive industry roadmap designed to help the industry achieve interoperability between solutions and help establish the foundations for a cost-effective commercial archival storage ecosystem for the explosive growth of digital data.
